

5th International

Practitioner Day

14th Sept. 2017 | St. Margarethen bei Knittelfeld | Styria | Austria

Award of the
2nd Austrian
KompOskar

IPD 2017 – The world's largest demo show of composting and biomass processing

Venue: Naturgut Kompostierung und Landschaftsbau GmbH
Gobernitz 11 – (47°12'59.2"N, 14°51'0.6"E)
8720 St. Margarethen near Knittelfeld, Austria
Date: 14th September 2017, from 08:30 AM

The Austrian Compost & Biogas Association is pleased to invite you to the 5th compost industry exhibition in St. Margarethen/Knittelfeld (Styria). The Practitioner Day will present innovations in composting technology and recent trends and visions will be discussed.

In Austria, currently almost 404 compost plants transfer about 1,16 million t of source separated organic waste and quality certified sewage sludge into high quality product compost and compost based substrates.

The successful partnership between plant operators, innovative engineering and research has enabled the continuous progress in the development of machines, facility design and quality management in composting.

An international audience will experience mobile machines for shredding and crushing biomass, newest techniques in the area of compost turners, sieving and separation technologies, process monitoring and controlling, manipulating and transporting as well as compost spreading. All this for a wide range of capacities and type of feedstock.

Recommendation: "KompOskar" 2017/2018
This year, the KompOskar will be awarded for the second time. Who produces the best compost in Austria?

Program

kompost
& biogas
verband

Through the program, you will be accompanied by gardening expert, moderator and composting fan Ing. Angelika Ertl.

- 08:30 AM Reception and registration
- 09:00 AM Welcome & Opening Chairman Hubert Seiringer (Compost & Biogas Association Austria), Johannes Dietmaier (Naturgut GmbH) & guests of honor
- Award of the KompOscar
Expert advice by Mag. Roland Ertl
- 10:30 – 17:00 AM Machine demo & product presentation
- all-day B2B information exchange, Catering with "Ochs vom Spieß"

Supported by the following national and international organizations and associations

Preserved manufacturing brands

Currently registered, 31 July 2017:

VOLVO

Compost **SYSTEMS**

Pusch & Schinnerl GmbH
Umwelttechnik | Maschinen | Consulting

Recommendation: For more information about machine demonstrations & product presentations please visit: www.kompost-biogas.info

Anmeldung – Registration
