Awarding of the  
4th Austrian  
**KompOskar**

# IPT 2021 – World's largest Demo Show for Composting and biomass treatment

Venue: **Brantner Österreich GmbH - Langenlois**

Landesstrasse 210, Parz. 115/3

3500 Gneixendorf, Austria

Time: **23. September 2021, from 8.30 a.m.**

The Compost & Biogas Association Austria invites you to the performance show of the industry in Gneixendorf in Lower Austria. Here, innovations are presented, trends set and visions discussed. In Austria, the compost product is currently produced each year from around 404 compost plants from around 1,56 million tonnes of biogenic waste. The development of new technologies through innovative partnerships between plant operation and plant engineering has made possible the progress that has been made so far in the field of com-

posting. Leading suppliers present to an international audience mobile machines for biomass comminution, the latest techniques in the fields of transferring, screening, measuring and regulating, manipulating and transporting. Visit and admire the exhibiting companies and their innovative products. The event is aimed at all practitioners: plant operators, waste handlers, waste management associations, farmers, contractors, planners, manufacturers, compost-interested and commercial enterprises.

## **Tipp: „KompOskar“ 2021/2022**

For the fourth time this year, the KompOskar will be awarded for composting. Who produces the best compost in Austria?

# Program

kompost  
& biogas  
verband

The Organic-gardener, author and ORF presenter Karl Ploberger leads through the program including the Demo-Show.

8.30 a.m.

Reception and Registration

9.00 a.m.
