Access plan

Winkler Erdbau GmbH
Am Hatric 110
A-8230 Hartberg

The venue is very good accessible by public transport.
The train station Hartberg is only 500 m away.

If you arrive by car build a carpool if it's possible.
There are park areas on site.

The site is largely barrier-free.

Our event is a **Green Event**:
ecologically - social - economically

We are also part of the initiative „G'scheit feiern“ -
an initiative for environmentally conscious events

9th International
Practitioner Day
Composting

18th Sept. 2025 | Erdbau Winkler | Hartberg (Styria)| Austria

Awarding of the
6th Austrian
KompOskar

IPT 2025 – World's largest Demo Show for Composting and Biomass Treatment

Venue: Winkler Erdbau GmbH

Am Hatric 110

8230 Hartberg (Styria), Austria

Time: 18th of september 2025, at 8.30 a.m.

The Compost & Biogas Association Austria invites you to the performance show of the industry in Styria (Austria). Here, innovations are presented, trends set and visions discussed. In Austria, the compost product is currently produced each year from around 400 compost plants from around 1,6 million tonnes of biogenic waste. The development of new technologies through innovative partnerships between plant operation and plant engineering has made possible the progress that has been made so far in the field of composting.

Leading suppliers present to an international audience mobile machines for biomass comminution, the latest techniques in the fields of transferring, screening, measuring and regulating, manipulating and transporting. Visit and admire the exhibiting companies and their innovative products. The event is aimed to all practitioners: plant operators, waste handlers, waste management associations, farmers, contractors, planners, manufacturers, compost-interested and commercial enterprises.

Tip: „KompOskar“ 2025/2026

For the sixth time this year, the KompOskar will be awarded for composting. Who produces the best compost in Austria?
