

Short text for newsletters and so on:

The Austrian Compost and Biogas Association invites you to the 9th International Composting and Biomass Practitioners' Day on September 18, 2025, at Winkler Erdbau GmbH in Hartberg (Styria).

IPT 2025 – the world's largest demonstration show for composting and biomass processing

Innovations will be presented, trends set, and visions discussed. Renowned exhibitors from the composting sector will be there! Over 700 visitors are expected.

A fixed component of the Practitioners' Day is the compost quality competition with the awarding of the Austria-wide KompOskar – Who produces the best compost in Austria?

Our event is a "Green Event" and also part of the "Celebrate Smartly" initiative.

Join us and register [here](#). Further information can be found at www.kompost-biogas.info.

Long text:

As an industry association, following the success of previous International Praktikertage (International Practitioner Days), we now invite you to the 9th of this kind. This unique event will take place this year on September 18, 2025, at the premises of Winkler Erdbau GmbH in 8230 Hartberg, Styria.

IPT 2025 – the world's largest demo show for composting and biomass processing

Innovations will be presented, trends set, and visions discussed. Renowned exhibitors from the composting sector will be there! Over 700 visitors are expected.

In Austria, around 400 composting plants currently produce compost from around 1.6 million tons of biogenic waste each year. The development of new technologies through innovative partnerships between plant operators and plant engineering has enabled the progress made in composting to date. Leading suppliers will present mobile machines for shredding biomass and the latest technologies in turning, screening, measuring and control, manipulation, and transport to an international audience. The event is aimed at all practitioners: plant operators, waste processors, waste management associations, farmers, contractors, planners, manufacturers, compost enthusiasts, and commercial enterprises.

A fixed component of the practitioners' day is the compost quality competition with the awarding of the Austria-wide KompOskar – Who produces the best compost in Austria?

Our event is a "Green Event" and also part of the "Celebrate Smartly" initiative.
